Capital Electric
A Sonepar Company

INDUSTRIAL
Automation & Control

Our team of sales, engineering and technical support strive to solve your most difficult problems each and every day. We cover all aspects from Automation trouble shooting, design applications, software, and programming to MRO materials supply chain, Vendor Managed Inventory and all things in between.

Here are some of the services we provide -

AUTOMATION SOLUTIONS:
Design Engineering Services including System Control Panel Design and Machine Safety Audit, just to name a few.

ON-SITE ENGINEERING SERVICES:
VFD commission, Trouble Shooting, Start up, & Technical Training...

REPAIR SERVICE:
AC & DC Motors – Servo Motors – Industrial Electronic – Hydraulics & Pneumatics – and much more. Extended warranty, fast turnaround, and free evaluation on all items...

TRAINING & PRODUCT DEMONSTRATION:
In house and on-site training to include CEC credits. We develop and build working models for your unique application to ensure form, fit and function prior to installation.

TECH SUPPORT HOTLINE (800) 220-8221:
Speak directly to an engineer with any technical questions about any product or manufacturer.

VENDOR MANAGED INVENTORY (VMI):
Store room and job site inventory management – detailed consumption reporting & trends – Storage Containers, Bins & Job Boxes.

DIGITAL SOLUTIONS:
Order online, anytime using **capitalelectricsupply.com** or download the app. Our digital solution includes working with ARIBA, Jagger, and SAP (Punchout or Portal Based).

KITTING & ASSEMBLY:
Improve productivity with our cost-effective specialty kitting and assembly services.

QUALITY & COMPLIANCE:
Committed to fulfilling your requirements, our trained associates work directly with the manufacturer to facilitate and manage quality and compliance documentation.
