

Q: What is MC Glide™ and why would I try it?

A: AFC, a leading innovator in armored cable products for nearly 100 years, discovered yet another labor- saving option with MC Glide™. This MC Cable with its unique armor profile allows for a faster, easier, smoother and, quieter installations, when pulling interlocked armored cable through metal studs and ceilings.

Q: Is MC Glide flexible?

A: MC Glide meets the flexibility requirements of UL 1569. You should find MC Glide™ to be equal to or more flexible than MC- Lite®.

Q: Does the new profile improve cable bend memory?

A: The profile of MC Glide tends to lay flatter than Legacy MC Cable; notably reducing curling or bend memory issues

Q: Can you pull MC Glide in either direction?

A: MC Glide, as with Legacy MC Lite® has a preferred direction for pulling, but MC Glide is easier to pull in both directions.

Note: MC Glide coils should be pulled from the center of the coil and MC Glide reels are reverse wound.

Q: Is a special tool required to cut MC Glide?

A: MC Glide's armor is easily cut with any cable handheld rotary cutter.

Q: Will MC Glide work with auto cutting machines?

A: MC Glide has been tried on several types of auto cutting machines with the same performance as legacy MC Lite cables.

Q: Is the conductor bundle under the MC Glide armor the same as legacy MC Lite?

A: Yes, you will cut, strip and terminate as with MC Lite.

Q: Are special fittings required for MC Glide?

A: No, you can use the same UL listed MC Cable connectors you prefer for legacy MC Lite. No special fitting requirements.

Q: Are anti-short bushings required with MC Glide?

A: Anti-short bushings are not required with any style MC Cable per NEC 330.

Q: Is MC Glide available in MC Tuff® lightweight steel armor?

A: Currently, aluminum armor only; but we are working to add steel to the MC Glide offering.

Q: Does MC Glide have phase & circuit ID on the armor?

A: Presently, MC Glide does not have ColorSpec® or ColorTrak® phase and circuit ID.

Q: Is MC Glide readily available?

A: Yes, MC Glide is readily available at both major distribution facilities, in New Bedford, MA and Chino, CA

Q: MC Glide is available in what sizes?

A: Our introductory sizes are 12/2 and 12/3 in solid and stranded 250'coils/1000'reels, including 120v and 277v conductor colors.

Q: Is MC Glide available in barrels & gaylords?

A: AFC is currently offering MC Glide in coils and reels only.
