

Do what you do best.

We got the rest.

20+ Jobsite Time Savers

Time is money on the jobsite. Let skilled installers focus on high-value work, while we handle those low-value tasks that slow you down or cause bottlenecks. Efficient solutions give you the flexibility to react quickly to changes, and higher productivity means your team can take on more and bigger jobs while improving jobsite safety.

PRO LOGISTIC SERVICES

1

FIXTURE CARTS

Easily transport light fixtures right to the installation location on a secure cart designed to protect them from damage. The carts are easy to maneuver without damaging walls or scraping floors. Plus, you save time that would be spent unpacking fixtures and managing cardboard and Styrofoam waste.

2

MATERIAL RECEIVING & INSPECTION

Let us identify and replace damaged material before it arrives at the jobsite so you don't lose any time waiting on what you need. Our trained team receives, inspects and stores material for you at our warehouse.

3

MATERIAL STAGING & STORAGE

When you order with Pro Logistic Services, your material is stored at our site. We can order ahead of time to manage supply chain issues. Your material is stored in a dedicated, secure location so you don't have to worry about it being stolen or lost or taking up space at the jobsite.

4

SCHEDULED DELIVERIES (JUST IN TIME)

Space on a jobsite is tight. If you get material too soon, you have to sort, store it, and work around it. If you get it too late, your team isn't able to work on the installation, which could cause a ripple effect of delays. Set an appointment, and we'll deliver at the scheduled time.

5

DELIVERY TO INSTALLATION LOCATION

Get your material sorted and delivered to the floor, wing, or room where it will be installed. No need to waste time searching the jobsite for parts that have gone missing. All you need is right there, when you need it.

WIRE SERVICES

6

PARALLEL WIRE REELS

Want to do a wire pull in a fraction of the time? A parallel wire reel takes up less space and saves your back. Instead of lifting and maneuvering multiple wooden reels, roll a single steel compartment reel on wheels over to where you need it. Pull multiple wires in one go for a more efficient, safer pull.

7

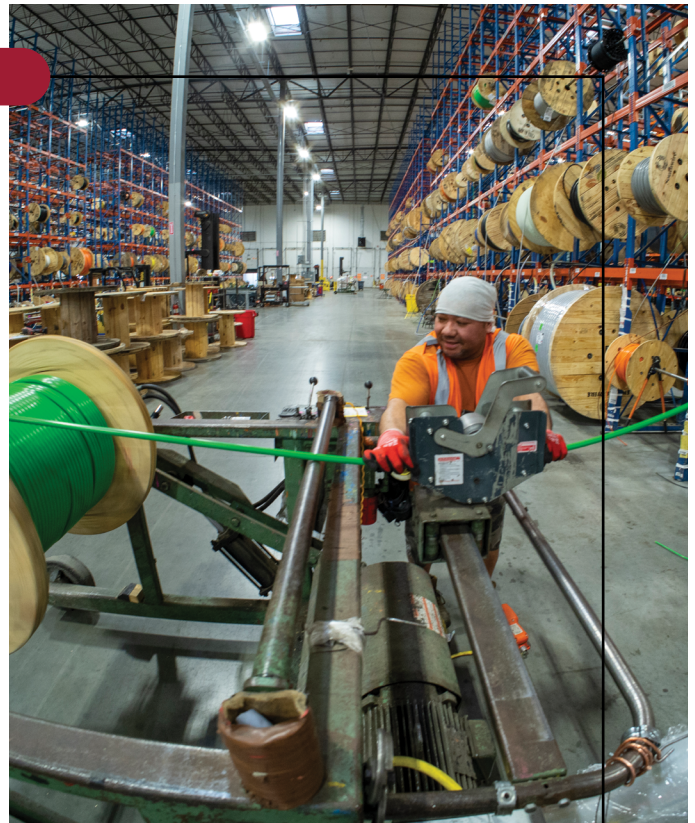

PULLING HEADS

Order your wire with pulling heads already installed instead of having to strip wire, tape it, put on a head, and crimp at the jobsite. Pulling heads allow for smoother and less forceful pulls, improving safety and reducing the risk of damage.

8

STACKED REELS

Combine multiple cable runs onto one reel with stacking. Stacked reels are quicker to set up, take up less space and speed up the installation process. We can help project manage so pulls can be stacked in the order you need them and labeled by installation location.

PROJECT SOLUTIONS

9

PROJECT SUBMITTALS

Gathering what you need for submittals can be a very time-consuming process. We provide accurate and timely submittal packages that will highlight questions up front so you can avoid problems and delays later.

10

ALTERNATE PACKAGE PROPOSALS

Supply chain delays can really throw a wrench in a construction timeline. If what you need isn't available with the lead time or price that works for you, let us find alternative products that fit the bill.

11

MATERIAL EXPEDITING

It happens. Material gets damaged, lost or delayed. Don't let it bring your jobsite to a halt. We'll help you get what you need fast so your construction timeline can move forward.

12

DIGITAL JOB CENTER

Find everything you need to manage your jobs in one place, accessible 24/7. Release material as needed and see what's been delivered and what's still at our warehouse. Customize permissions so your team members can view or manage what they need to.

LIGHTING SOLUTIONS

13

LIGHTING TAKE-OFFS

We can reduce the amount of time spent on lighting take-offs by 75% using AI-enhanced software. Forget manually counting symbols and human error. We'll get you an accurate bill of materials for your lighting job in a fraction of the time.

14

SPECIFICATION ASSISTANCE

Get specified packages that are not only tailored to your individual take-offs but also include alternative products with faster lead times or a lower cost. Work with our quotations team for packages that allow you to start your project on time and stay on schedule.

15

LIGHTING AUDITS

Would you rather replace a few fixtures or upgrade hundreds? Let us complete a lighting audit so you can make the business case for an LED retrofit or lighting controls, showing your end customers their energy consumption and return on investments.

16

EXPEDITED CONTROLS COMMISSIONING

Our lighting specialist can come to your site to program and test a new lighting controls system. We'll ensure that the system operates as intended to reduce energy consumption and operating costs.

RENEWABLE SOLUTIONS

17

CUSTOM JOBSITE DELIVERIES

We don't rely on third party logistics so we can offer fast, flexible delivery options even to residential areas. Our fleet stands ready to bring you what you need. When you request kitting, we'll deliver complete projects to your jobsite ready to build.

18

NAVIGATING SOLAR INCENTIVES

Does navigating local or federal solar incentive programs slow you down? Let us help. We can provide the policy expertise and grant-writing skills necessary for success.

19

SOLAR KITTING

We can kit and supply your complete bill of materials via our user-friendly digital sales platform so you can focus on installing, not shopping.

PREFABRICATION

20

PIPE/CONDUIT BENDING

Let us carry the cost of expensive bending equipment while you get made-to-order custom bends delivered. We handle the most complicated requests and ensure the highest quality standards on every order.

21

CONTROL PANEL BUILDING

In a controlled and specialized warehouse environment, we meticulously build and test panels before we ship them. Whether you need a single control panel or multiple copies, we can scale with your needs and ensure our solutions are compliant with requirements and fit your application.

22

FIXTURE WHIPS

Traditional methods of measuring, notching, and cutting armored cable are time- and labor-intensive, not to mention all the leftover MC cable. Pay only for what you need and order pre-assembled fixture whips bundled per area, room or hallway.

DIGITAL SOLUTIONS

23

ONLINE ORDERS AND QUOTES

Whether you place an order by phone, in store, or online, you can view the status of all your open orders and quotes on our website instead of searching emails. Filter by PO#, product name, ship date, or order status. Register for a free digital account for access to this and much more.

24

TRACK AND TRACE

Know where your material is from the moment you place an order to the moment it's delivered. Get delivery notifications so you know down to the minute when it's arriving and can plan your resources effectively.

25

MOBILE APP

When you're on a jobsite or away from your computer, our mobile app gives you 24/7 access to everything you normally get from our website, including saved quotes, product spec sheets, real-time shipment tracking, and more.
