

DWV015

10G Dust Extractor

- **MAXIMIZE SUCTION** – Tackle a variety of jobsite applications with a powerful and efficient motor that delivers 155 CFM of airflow.
- **CONVENIENT STORAGE COMPATIBILITY** – Connect this Dust Extractor to your TSTAK® or TOUGHSYSTEM® Storage Solution (sold separately) for additional functionality, portability, and durability. The integrated Storage Accessory Rack features durable latches that allows for a secure connection even while moving.
- **MINIMIZE DUST EXPOSURE** – Efficiently collect fine dust like concrete and drywall with HEPA filters.

Product Overview

Stay in compliance with current 1926.1153 OSHA dust regulations utilizing the powerful 10 Gallon Wet/Dry HEPA Dust Extractor with Automatic Filter Cleaning. Delivering up to 155 CFM suction, with a 90 in. static water lift, this convenient dust solution features an automatic filter cleaning system that initiates every 30 seconds. When paired with fleece vacuum bags (DWV9402) and a 99.97% efficient HEPA filter (DWV9330) this product helps prevent releasing harmful dust into the work environment. For added convenience, an optional storage rack is available to interlock with TSTAK® and TOUGHSYSTEM® Storage solutions. This tool comes Tag Ready™ for seamless integration into the DEWALT® TOOL CONNECT™ System.

Additional Features

- **AVOID UNPLANNED INTERRUPTIONS** – Maintain a clean filter with the Automatic Filter Cleaning system that provides continuous operation.
- **POWER TOOL ACTUATION** - Control the On/Off function of the extractor with a power tool.
- **SPEED CONTROL** – Optimize the unit's performance with variable suction that controls the power consumption and amount of suction.
- **DUAL-USE FUNCTIONALITY** – Operate this Dust Extractor for both wet and dry applications.
- **JOB SITE MANEUVERABILITY** – Move freely in rugged terrain with the telescoping handle and heavy-duty wheels.
- **SAFEGUARD FOR TRANSIT** – Secure the extractor to scaffolding or during transportation with multiple lift and tie down points.
- **MEETS EPA STANDARDS** - Meets the EPA Lead Related Renovations, Repair and Painting (RRP) rule for HEPA vacuum only when DWV9330 Filter is used (Filter included with unit).
- **NO ASSEMBLY REQUIRED** - For out-of-the-box functionality, this unit comes fully assembled.

Includes

(1) Dust Extractor (DWV015)

(2) HEPA Filters (DWV9330)

(1) Hose 15ft 36mm AntiStatic NonMarking (DWV9336)

(1) 36mm Air Lock® Adapter (DWV9036)
