

5 CFM DUAL STAGE VACUUM PUMP WITH OIL

Item#: 1948121

Your days of messing around with clunky, unreliable pumps are over. The first thing you'll notice is how two durable hoist points allow you to transport your vacuum pump with ease. Simply attach the hilmer HVAC/R Carrying Strap, throw it over your shoulder and get to work. Several innovative features also help make changing oil easier. The front of the pump where the oil is stored is sloped downwards, creating a natural path for oil to drain faster. An oversized sight glass allows oil to be checked easier and an oversized oil fill port makes pouring in new oil easier. These vacuum pumps have been retooled to make evacuation as easy as possible.

Product Features & Benefits

- A sloped and channeled housing helps drain oil fast.
- Quick, Easy Access to a large oil fill port.
- Quickly identify oil level and detect oil contamination through a large sight glass.
- Gas ballast removes excess moisture extending the life of the oil.
