

## Hand Cleaners

Klein offers a complete line of professional-quality hand cleaners. They remove grease, grime and stubborn stains without water, while protecting and conditioning your hands.

Three different formulas are available in color-coded containers. The base formula (yellow label) is a heavy-duty grade. A pumice heavy-duty formula (blue label) provides extra scrubbing action to help remove the worst grease and grime. The third type is an antiseptic heavy-duty formulation (gold label) that helps defend against dermatitis and the build-up of microbial concentrations.

Klein hand cleaners contain no harmful ingredients—no phosphates, no free ammonia, no harmful solvents, no free caustics, and no kerosene.

Each formulation contains premium skin conditioners such as lanolin and aloe that systematically help reduce skin irritation, roughness and chapping, and help keep hands smooth.

Both cream and lotion types are available in a variety of containers. There are small individual sizes that go anywhere in a pocket, tool box or vehicle. There are also large economy sizes for multi-user dispensing on job sites. Two types of dispensers are available.

### Heavy-Duty Professional-Quality Formula (Yellow Label)

The base formula is a heavy-duty professional-quality grade that is hard on dirt, but easy on your hands.

Cleans without water. Quickly removes the toughest dirt and grime including greases, inks, common paint, glues, rubber-gasket and tile cements, food and grass stains, and other stubborn substances from your hands. It will also clean most painted surfaces including auto bodies, chrome, whitewall tires, plastic floor and wall tile, counter tops, and other washable surfaces. The base formula is also a very effective laundry pre-spotter and in-wash booster for detergent.

Klein hand cleaners contain lanolin and aloe to moisturize and condition your skin. Regular use not only keeps your hands clean, but also conditions and helps keep them smooth.

Klein heavy-duty formula comes in lotion and cream types, in five handy container sizes... small individual sizes for convenient carrying in tool boxes, pouches, vehicles and pockets... and large economy sizes for dispensing hand cleaners anywhere near dirty work.

Cat. No.	Type	Size Container
51400	DISCONTINUED	
51408	Cream	14-oz. can (397 g).
51412	DISCONTINUED	
51416	DISCONTINUED	

† **Important:** This big, economy-size dispenser refill offers 22% more cleaner than conventional 4.5-lb. cans, and generally costs less per pound. It is designed to fit most 4.5-lb. dispensers offered by other manufacturers as well as Klein's push-type wall dispenser Cat. No. 51420.

### Pumice Heavy-Duty Professional-Quality Formula (Blue Label)

Cleans without water. The pumice formula offers all the benefits of the base formula, plus pumice scrubbing action. Pumice helps power out the worst grease and grime. Makes fast work of those extra tough... extra dirty jobs. The pumice formula also contains lanolin and aloe to moisturize and condition your skin. Regular use not only keeps your hands clean, it also helps keep them smooth.

Cat. No.	Type	Size Container
51401	Lotion	7.5-oz. squeeze bottle (222 ml).
51409	Cream	14-oz. can (397 g).
51417	Lotion	1-gal. bottle with dispenser pump (3.8 liters).

‡ This is a self-dispensing can. Each can contains an easy-to-use push plate for controlled dispensing.
