WHAT WE TEST:

Rubber Gloves, Sleeves, Blankets, Line Hoses, Overshoes, Matting, Plastic Covers, Hot Sticks, Grounds and Jumpers

HOW WE TEST:

- 1) Check-in (Inventory of all items received and recorded on Test Report)
- 2) Washing (Machine and hand washed to remove grime and previous certification stamp)
- 3) Visual Inflation Inspection (Checked both inside and outside to identify tears, cuts, holes and any other irregularities)
- 4) Dielectric Testing (Based on voltage classification of each item)
- 5) Drying
- 6) Certification Stamps (Applied just prior to shipping, includes date tested and maximum use voltage)
- 7) Shipping and Record Keeping (Detailed Test Report, by item, included with each order and a copy kept at the test lab)

WHEN TO TEST:

Type of Equipment	Maximum Test/Retest Requirements*
Insulating Gloves	Before first use and every six months thereafter
Insulating Sleeves	Before first use and every 12 months thereafter
Insulating Blankets	Before first use and every 12 months thereafter
Rubber Line Hose & Covers	Upon indication that insulating value is suspect
Plastic Covers	Upon indication that insulating value is suspect
Hot Sticks	Before first use and every two years thereafter
Rubber Insulating Matting	Upon indication that insulating value is suspect
Dielectric Overshoes	Upon indication that insulating value is suspect
Jumpers and Grounds	Upon indication that insulating value is suspect

*This is the maximum length of time allowed. Work practices and internal policies often dictate more frequent testing

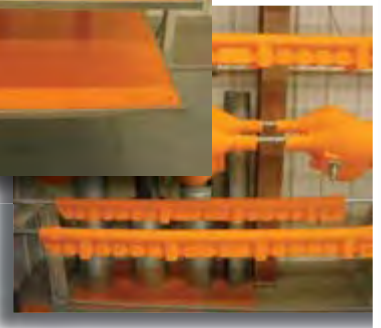

**We are one of the largest stocking distributors
of Salisbury and Chance rubber insulating
equipment in the country!**

HOW WE REPAIR

Our standard procedure is to repair all tools if less than half the replacement cost based on the manufacturer's suggested list price. We will contact the customer if this occurs to review replacement options and provide a quote. Irby will also provide an estimate of tool repair. If the tool is repaired or replaced the cost of the estimate will be factored into the final price. A typical estimate takes less than an hour and is billed at our shop labor rate.

High Speed Steel Cutter Kit

- Lasts 10 times longer than standard hole saws
- Precision-ground teeth cuts smooth, burr-free holes
- Capacity: 1/4"
- Durability and speed provide low cost per hole
- Split-point pilot drill prevents "walking" - makes accurate hole placement easy
- Spring-loaded slug ejector
- No tool required to change cutter sizes
- Less chance of broken teeth because the saw body is machined out of solid, high-speed steel
- Includes:
 - 7/8" to 2-1/2" Cutters
 - (2) Small arbors for extended assembly to 7/8" and 1-1/8" cutters
 - Large arbor
 - Hex wrench
 - Case
- For conduit sizes 1/2" through 2"

OREGON® PowerNow CS250E 40V MAX® 14" Chainsaw Kit with Endurance Battery Pack

- Cuts up to (250) 2" to 3" tree branches on a single charge
- Powers through wood poles 10" to 12" in diameter
- Quieter than gas-powered chainsaws in use and is silent between cuts
- At just under (11) pounds, it is lightweight, easily portable
- No pull cords, no oil-gas mixing and no warm-up times
- Lithium-ion battery pack, offers instant starting without a pull cord
- Long runtime, no memory effect, holds charge when not in use
- Saw kit includes: 40V Max® Chainsaw, 14" guide bar, PowerSharp Chain, Endurance Battery Pack, charger and oil

Oregon PowerSharp built-in chain sharpening system so you'll never cut with a dull chain again. When the chain dulls, simply pull the PowerSharp Lever for (3) to (5) seconds with the saw running and the chain will work like new. Ideal for storm work, topping poles and trimming branches from the bucket.

HW1 1/2" Hydraulic Impact Wrench

- Impact and temperature resistant replaceable polymer gripe designed to dissipate heat from the cast handle
- Improved center-of-gravity for superior ergonomics
- Increased service life with the addition of back-up rings and larger O-rings
- Built-in hydraulic check valve
- Large and strong lifting eye for easy and secure storage
- Longer and wider trigger
- Fast and easy change between open center systems and closed center systems with no disassembly required
- Higher breaking torque in reverse to ensure you can remove tightened bolts
- Cast motor enclosure that better protects the impact mechanism operation versus competing models with stamped steel enclosure
- Includes the 49314 heavy-duty 1/2" square drive adapter
- Operating pressure: 1,000 - 2,500 psi
- Capacity: 7/16" hex
- Length: 8.2"
- Weight: 6.5 lbs
- Maximum torque: 500'-lb @ 8 gpm

HID6506 Rotary Impact Hammer Drill

- Adjustable flow control prevents overspeeding and allows precise control of drilling speed
- Hammer drill in concrete, brick, rock and other difficult to drill materials
- Drill in wood or steel with auxiliary chuck
- Super spool selector control for use on open and closed center hydraulic systems
- Selector for drill or hammer/drill modes
- Rugged gear motor, reversible
- Built-in slip clutch to guard against over torque
- Depth gauge and auxiliary handle are removable for tight areas
- Length: 12"
- Operating pressure: 1,000 - 2,000 psi
- Speed: 775 - 1,100 rpm @ 6.5 gpm
- Chuck: SDS plus bit shanks

12-Ton Low Pressure Crimper

- No high pressure intensifier required
- Relief valve signals operator when crimp is complete
- Compatible with dies for:
 - Burndy Y35
 - Alcoa 12A, 12AC, 12HA, 12HAC
 - Anderson HC-12, HC-12H
 - Thomas & Betts 12-ton (LPK1240)
- Accepts standard "U" Style dies (LPK1230)
- Crimps up to 750 MCM copper and aluminum (LPK1240)
- Head rotates for easy tool positioning
- Powered in both the advance and retract directions to prevent hang-ups
- Relief valve assures 12 ton crimp with 1,500 - 2,500 psi system

Hydraulic Chainsaws

- Ideal for large trimming applications and cut-up removal jobs
- Chain and bar can be adjusted without removing sprocket cover
- Sprocket cover can be removed without tools for easy saw cleaning
- Handle position can be oriented to horizontal or to 60° or 30° relative to bar and chain to user preference
- Rugged gear motor and expanded chip exit area
- Automatic chain oiler can be adjusted without tools
- Safety features include two-step safety trigger, high impact polymer front handle/shroud, wide lower handle protects hands/knuckles and chain catcher stops chain rotation
- Reduced kickback bar and chain
- Supplied with 12" steel braided whip hoses
- Chain size: 3/8" pitch

Single Acting 12-Ton Crimper, High Pressure

- Use Greenlee KC12, KA12 and KD12 crimping dies as well as industry U-type dies
- Crimping head has 1.65" opening
- New head designs result in lower weight and improved durability - tested to 50,000 crimp cycles
- Boss included on each crimping head for use with hotsticks
- Easy to get into tight locations, lightweight makes them excellent choices for hotstick use
- Single acting tools require an external hydraulic pump capable of 10,000 psi
- Equipped with a 3/8" male screw type coupler
- Capable of crimping a wide range of lugs, C-taps, H-taps and overhead tension sleeves
- Covered head models have two layers of PVC that total approximately 3/16" thick
- Outer layer is black and the inner layer is red
- Includes carrying case
- Crimping force: 24,000 lbs
- Jaw opening: 1.65"

- Jaws slide open quickly to save time between cuts
- 11 Ton ram powers cutting jaws
- Jaws are specially hardened and precision-ground to hold sharpness
- Lightweight
- Capacity:
 - 1,000 kcmil copper or aluminum cable
- Jaw opening 1-15/16"

Hydraulic Booster Assembly

- Small and compact
- Operates 10,000 psi remote head tools
- Able to operate on either open or closed center hydraulic systems without making any changes to the tool
- Uses the Dynapress remote control valves and hose sets
- Supplied with pressure and return high pressure screw-type couplers
- Supplied with convenient foldable carrying handle and can be permanently mounted
- Input pressure: 1,000 - 2,200 psi
- Maximum back pressure: 200 psi
- Output pressure: 10,000 psi
- Port sizes: 1/4-18 NPSM
- Relief valve setting: 10,000 psi
- Return port: 3/4-16 SAE O-ring
- System: open and closed center

Super "U" Arm Extensions

- Super "U" Arm is designed with a profile "U" shape for greater strength and durability
- All arms include insulated conductor holders to insure dielectric integrity
- Arms are rated for 34.5kV phase-to-phase work applications
- Standard Super "U" accepts 1-1/16" OD or up to 800 MCM conductor
- Large capacity Super "U" holder has an opening of 2-5/8"
- All Super "U" Arms and Super "U" Conductor Supports have a load limit of 200 lbs per wire holder
- Interchangeable hanger loop kits are available for the different sizes of cross arms on your system

Wire Puller Hooks

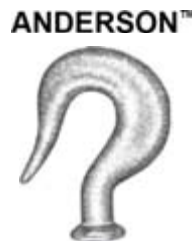

- Fits most popular porcelain or polymer deadend insulators
- For use in cutting dead ends and pulling slack on automatic deadends
- Can be applied by hand or with hot stick
- Maximum rated load of 3,500 lbs

Irby #	Mfg #	Description
46748	WPH3	Wire Puller Hook

Forged Steel Hook

- Used to attach ball and socket or clevis insulators directly to the tower attachment pad
- Self-locking design
- Ultimate strength: 30,000 lbs
- 3-1/8"L, 7/8"W, 23.32"T

Irby #	Mfg #	Description
2965104	HB30L	Steel Hook Hardware Fitting

Forged Steel Ball Clevis

- Used to attach ball and socket insulators to other associated tower hardware
- Body and clevis pin - galvanized steel
- Cotter pin - stainless steel
- Ultimate strength: 30,000 lbs
- 2-7/8"L, 1-9/16"B, 15/16"W, 5/8"PD

Part #	Mfg #	Description
2910925	AB-1	Universal Crossarm Bracket

Sagwatch

Tallman Equipment

- Used to accurately determine sag simply and rapidly
- Water and shock resistant
- Antimagnetic, housed in a stainless steel case

Part #	Mfg #	Description
89197	SW-E	Sagwatch

Sagometer

Tallman Equipment

- Accurate thermometer encased in a section of aluminum conductor
- Helps determine the actual temperature of the conductor being sagged
- Range is -40° to 160°F

Part #	Mfg #	Description
89199	CT40-160	Sagometer

Clipping Hook

Tallman Equipment

- 6,500 lb Safe working load
- Each unit is tagged showing the safe working load, proof test date, and an identifying serial number

Part #	Mfg #	Description
118158	S22-771	Clipping Hook

Handline Block

- Swivel eye is made of high strength forged steel and is fastened to head with welded nut for positive security
- 3" Aluminum alloy block
- Top-opening with snap hook
- Rated: 1,250 lbs

Jameson Buddy® System

Fiberglass core is coated with high visibility polymer sheath to protect against rod abrasion and reduce friction
 Round, flexible rod slides easily over wires in occupied conduit
 Exceptional bending strength for maneuvering tight turns
 Non-conductive and will not kink

Good Buddy® Fiberglass Conduit Rodder

- Unit folds to 10" width for carrying into manholes
- Reel can be detached from frame
- Frame handle for easy transport
- Friction brake and safety roller feed
- Operates vertically or horizontally
- Accessory Kit included (9-25-AK)

Grips and Cable Pulling Tools

Adjustable Primary URD End Stripper

- For 600V to 35kV cables
- Strips XLPE, polyethylene and EPR insulation
- Precise stripping of insulation only or insulation and semicon simultaneously
- New adjustable strip stop with rotary mechanism
- New adjustment window allows easy setting of stop
- Guarded cutting blade prevents injury
- Accepts SW 2 ratchet wrench for leverage
- Bushing insert fits over cable and presets cutting blade depth
- (See Bushing Selection Table for additional options)

Load Break Bushing Insertion Tool

- For 200A bushing inserts with internal hexagon socket drive
- Secures bushing insert for positive installation and removal
- Multiple drive systems:
 - Adjustable "T" handle
 - 1" Square socket drive
 - 7/8" Hexagon for wrench
 - Standard 'Penta' Head

Irby #	Mfg #	Description
61238	LBIT1T	Preset Torque Setting of 180in-lb

Load Break Elbow Probe Insertion Tool

- For 15kV to 35kV elbow - small interface
- Quick and easy insertion of the probe inside the elbow
- Prevents load break probe contamination
- Prevents load break probe breakage
- Reduces cross threading
- Provides the proper tightening forces as recommended by the elbow manufacturers
- Multiple torque delivery system:
 - Adjustable and removable "T" handle
 - 7/8" Steel drive and wrench
 - 3/8" Square drive socket
- Load break probe removed by simply reversing the tightening action

Polywater® J High Performance Wire & Cable Pulling Lubricant

- High performance, clean, slow-drying, water-based gel lubricant
- Provides maximum tension reduction in all types of cable pulling
- Temperature stable
- High cling factor
- Recommended for long pulls, multiple-bend pulls and pulls in a hot environment
- Dries to form a thin lubricating film which retains its lubricity for months after use
- Specification grade lubricant that does not promote flame propagation
- Harmless to humans and environmentally safe
- Compatible with all common cable jacket materials
- UL & CSA Listed

G Series Ratchet Lever Hoist

- Roller chain can be spliced to create longer lifts and can handle higher capacities than coil chain
- Ideal for utility transmission and distribution work
- Unit and handle made from malleable iron
- Riveted construction makes the unit tamper-resistant
- Free chaining mechanism allows quick and easy take-up and positioning of slack chain
- Handle stops prevent handle from spinning if it is accidentally released by the operator
- Single or double locking pawl design
- Hoist can lift, pull or bind
- Hoist will not free chain when under load
- Hoist can be operated from either side and will work in any position with equal efficiency
- Snap hook and link allows operator to convert unit to next smaller capacity to give longer lift and faster operation
- Snap hook acts as an end stop and will not pass through chain sprocket

CUSTOM GROUNDS AND JUMPERS BUILT AND TESTED TO YOUR SPECIFICATIONS

GROUNDING EQUIPMENT CONSIDERATIONS

A grounding set consists of 3 main components: two clamps, a length of cable and a pair of ferrules. When choosing your components the functionality of the grounding set determines the clamp style. The maximum-potential system fault-current magnitude and full duration determines the clamp and cable capacity. The terminal of the clamp style, pressure or threaded will determine the ferrule style, plain or threaded. At the job-site, the application of the grounding set affects the clamp and cable dimensions.

GROUNDING CABLE

Copper grounding cable is extra flexible for handling ease, yet durable enough for long wear. Yellow and clear jacketed cable is smooth with resistance to abrasion, weather and oil in accordance with ASTM specifications. The yellow jacket T-prene rubber compound cable has a low temp use of -20 degrees. The clear ultraviolet PVC jacketed cable has a low temp use of 0 degrees.

JUMPER EQUIPMENT CONSIDERATIONS

A jumper set consists of 3 main Components: two clamps, a length of cable and a pair of ferrules. All insulated jumper components meet ASTM 2331 Standards. Mechanical jumpers are used for bypassing work areas where equipment is under repair or when a line is being upgraded.

JUMPER CABLE

Jumper cable features an insulation and jacket combination to ensure resistance against abrasion, heat, oil, moisture and ozone. The coating is mold-cured ethylene-propylene based to ensure extreme flexibility even in low temps. The orange color creates high visibility and is Type 1 per ASTM F2321.

CLAMPS, FERRULES, AND OTHER ACCESSORIES

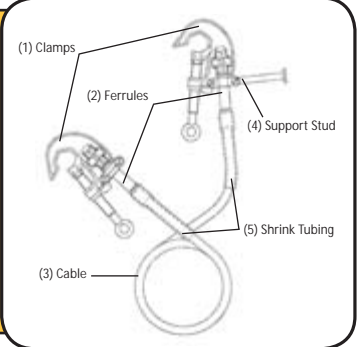

Irby stocks a wide variety of ground and jumper components to meet your specifications. See the Grounds and Jumpers Section of this catalog for a complete selection.

ORDER FORMS FOR CUSTOM GROUNDS/JUMPERS

See the Reference Section of this catalog for easy to use custom grounds and jumpers order forms that walk you through the process insuring your set is complete and meets your specifications.

To Order Custom Grounds:

- Step ① Select clamp style, class and grade based on purpose of clamp
- Step ② Select cable size, length and jacket color
- Step ③ Select ferrule style, material and size based on the size of your cable and style of your clamp
- Step ④ Select shrink tubing (required if unshrouded ferrules are selected as part of the grounding system)
- Step ⑤ Select a support stud (optional)

IRBY TOOL & SAFETY

Our knowledgeable sales team assists you through the ordering process to customize grounds and jumpers specific to your needs. We stock a wide range of clamps, cables and components that enable us to provide quick order turnaround, and we offer testing and repair on any used sets.

CUSTOMIZED SERVICE

Cable is cut to order, clamps and ferrules are selected to meet your specific requirements and sets are tested to verify their resistance is within ASTM guidelines. Once the set is complete, it is identified with an Irby serial number and date of assembly which are recorded on ship tickets and invoices. A serial number is established to identify individual parts, making the replacement or reorder process simple and fast. Irby works with you throughout the entire process to satisfy your requirements and exceed your expectations.

TESTING AND REPAIR

Irby can test all sets to insure they remain usable and in compliance with safety regulations. Irby inspects, cleans and tests grounds and jumper sets in accordance with ASTM F2249-03 and ASTM F2321-05. Our repair shop can bead-blast clamps and ferrules or replace any necessary parts to keep your sets functioning properly.

RAPID RESPONSE

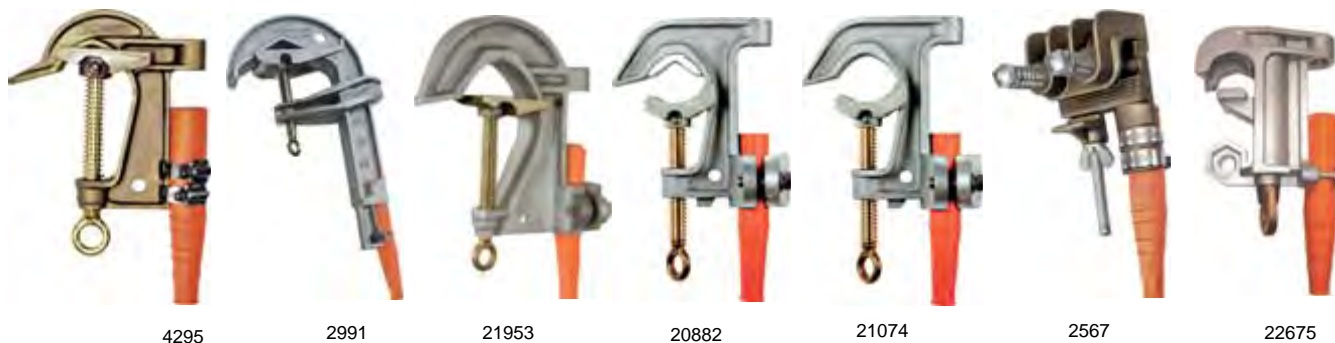

In most emergency situations, Irby can build and ship grounds and jumpers on the same day the order is placed. Rapid turn around on most orders for common grounding sets.

Grounds and Jumpers

Universal Distribution C-Clamp

- This universal distribution c-clamp can also be used on a jumper cable
- Thermal shock indicator changes color when the clamp reaches a temperature of 200°F (93°C)
- Stress relief to reduce cable damage and serve as a shock damper if fault occurs, which protects cable strands
- Locations on each side of clamp for 25mm grounding ball studs installation, which serve as support studs for either a grounding cluster or cascade assembly
- Fitted to receive a 5/8-11 UNC threaded stud ferrule
- Lubrication chamber for upkeep of threads
- Installation eye for installing clamp with shotgun stick
- Double internal threads for fast removal
- Material:
 - Aluminum clamp and keeper
 - Bronze or aluminum eye screw
- Weight: 1.4 lbs

Large Universal Transmission Clamp

- Installation on conductor, round bus bar and grounding ball stud of 30 mm
- Tested to 5H (HC-10041) and 7H (HC-10041-A)
- Tested and certified only with MPS components
- Stress relief to reduce cable damage and serve as a shock damper if fault occurs, which protects cable strands
- Fitted to receive a 5/8-11 (5H) or 3/4-10 (7H) UNC threaded stud ferrule
- Lubrication chamber for upkeep of threads
- Double internal threads for fast installation and removal
- No exposed threads for minimal maintenance

Support Stud

CHANCE

- Can be installed on most ground clamps
- Replaces restraining strap immediately below terminal
- Serves as a mechanical parking stand for a second clamp

Irby #	Mfg #	Description
42276	G3626	Stud for Rear Mount

Cluster Support, 1-Terminal Type

CHANCE

- Hangs grounding sets on the pole to facilitate lifting clamps
- Accepts plain ferrules on #2 to 4/0 grounding cable
- Copper bar length is 11"

Irby #	Mfg #	Description
43490	C6000152	Ground Cluster Support

Cluster Bar

CHANCE

- Compact 5" aluminum-alloy bar (5/8" diameter) accepts C-type or duckbill clamps
- For phase-to-phase grounding technique
- Adjustable wheel binder and 36" chain for pole applications
- Hook style for attachment to tower angles

Temporary Ground Rod

CHANCE

- Screw ground rod provides a temporary ground
- For when a system ground is not available
- Reusable ground rod is copper-clad steel
- Helix and handle are bronze

Irby #	Mfg #	Description
4013	G3370	Screw Ground Rod

Grounds and Jumpers

Personal Protective Ground Grid, Pre-Packaged Kit

- For standing on during various energized and de-energized work practices
- Consists of a high-ampacity tinned-copper-braid cable sewn in a grid pattern onto a vinyl/polyester fabric
- Includes:
 - Ground grid with long ball stud and illustrated instructions
 - Ground set
 - Storage bag

Ground Mat

- Portable mat provides a method to establish an equal potential zone for multiple grounding applications
- Vinyl polyester fabric, with high ampacity, tinned-copper braid sewn into a grid pattern
- The copper grid connects to a 6" termination stud on the corner of the mat
- The ground mat is then bonded to the equipment being worked on
- Reversible, easy to store, easy to clean with standard hose pressure

Grounds and Jumpers

Mechanical Jumper Clamps

- Thrust bearing design provides low friction for tightening clamp
- Bronze clamping rings have serrated contact surface to insure good electrical contact with conductors
- Grip tabs are molded in for easy gripping with rubber gloves
- Rated for 400A continuous current maximum rating (dependent on the rating of the jumper cable used with the clamps)

Irby #	Mfg #	Description
26288	13765	Clear, Medium Range to 556 ACSR
78348	13768	Clear, Large Range to 954 ACSR

Mechanical Jumper Clamps

- Clear plastic jumper clamps are compact, lightweight and virtually unbreakable
- Transparency allows easy inspection of the ferrule and cable inside of the handle
- Body and jaw are made from copper based alloy

Custom Winch Lines

Custom winch lines are available and made to order. Please specify the following when ordering:

- Type of rope (Yale Double Esterlon orange recommended for most applications, other rope types available upon request).
- Diameter of rope
- Finished length of winch line (in ft.)
- Number of eyes to be spliced
- Size of eyes (4" or 6" eyes are standard)
- Working load limit
- Winch line hardware such as bronze or galvanized thimbles, spool shield and shackles, winch line hooks, etc...available upon request

Dielectric Rope for Hand-Lines

YALE CORDAGE, Hy-Dee Brait is an 8-strand bi-polymer rope with extraordinary dielectric properties. The rope is mainly used for **Hand-Lines** and is nubby which provides excellent grip and is treated with a proprietary chemical mixture. This treatment is the key to Hy-Dee Brait's wet dielectric performance and allows us to make the highest dielectric strength rope commercially available. Hy-Dee Brait **complies to ASTM F1701-12** which calls for a maximum leakage of 250 micro-amperes at any time during the wet test. Electrodes are 1 foot apart, shielded and the test is conducted at 50KV-AC. **This product is 100% lot tested for dielectric conformance.**

- Easy to splice with a tucking procedure or by the quick splice method illustrated.
- Cut the end of the rope at an angle, and brummell it through the standing part of the rope five times. The insertion point each time moves down the rope two pics before the end is reinserted and passed through the rope. The splice is finished by cutting off the extra rope and taping it to the standing portion of the rope.
- This quick splice develops 90% of the ropes strength and is acceptable for most applications
- Sold only in 600 ft. reels.

Buckingham Body Belt Sizing Chart

1. Determine your "Y" measurement (see method and diagram below)
2. Determine what Class your Body Belt is in using the chart below (ex. A 2000M belt is in Class 1)
3. Find your "Y" measurement and then go across to the column that has your Class belt in it and this is the D-size you need to order (ex. Your "Y" measurement is 24" and you want a Class 1 (2000M) Body Belt you would order a size 26)

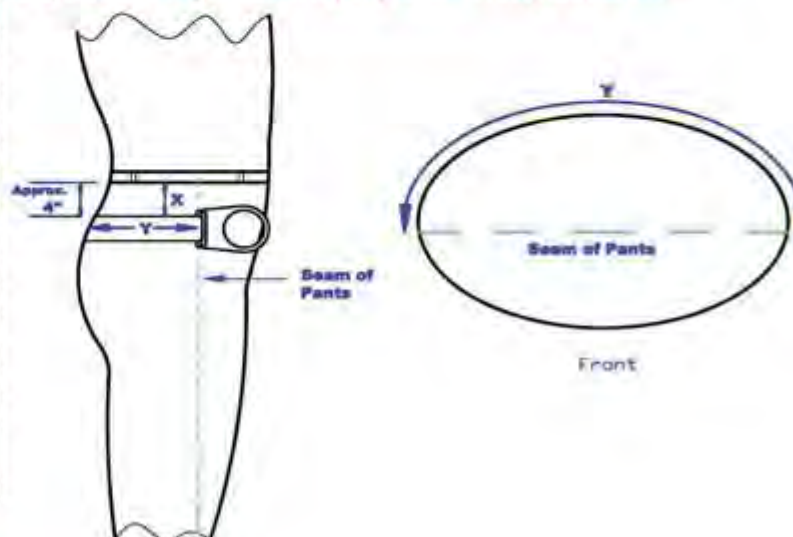

Class 1	2000M, 2000EM, 20003M, 20005M, 20006M, 2100M, 20182M, 2107M, 1988M, 1958, 1962M, 19655M, 1902, 1993F, 1994F, 1994FR, 4200

NEW Ti125, Ti110, Ti105 and Ti100 Thermal Imagers

- With the innovative features and functionality in these imagers, you can perform infrared inspections faster and more efficiently and thoroughly document problem areas for additional follow-up
- Exclusive IR-Optiflex™ Focus System - ensures that images are in good focus from 1.2 meters (4 feet) and beyond for optimum image clarity and scanning convenience; for shorter distances change to manual mode (Ti110 and Ti125)
- IR-Photonotes™ Annotation System - quickly identify and keep track of inspection locations by adding digital images of important information and surrounding areas (Ti110 and Ti125)
- Fluke IR-Fusion® Technology (Ti125, Ti110, Ti105) accurately identify potential issues by combining digital and IR images
- Autoblend™ Mode - the blending of a digital and partially transparent IR image into a single information-filled image (Ti125 only)
- Multi-Mode video recording - focus-free video in visible light and infrared with full IR-Fusion (Ti110 and Ti125 only)
- Communicate the location of problems with the electronic 8-Point Cardinal Compass (Ti110 and Ti125 only)
- Includes:
 - AC Power adapter
 - Lithium Ion smart battery (Ti125 includes (2) each, other models include (1) each)
 - USB Cable
 - SD Memory card
 - Rugged hard carrying case, soft transport bag, adjustable hand strap
 - Ti125 Models also include a 2-bay charging base and multi-format USB memory card reader

NEW Ti400, Ti300 and Ti200 Advanced Performance Thermal Imagers

- Quick transfer of images from imager directly to PC, iPhone® or iPad® with WIFI® connectivity
- Easy analysis and quick reporting in the field with the new Quick Smartview® mobile software app for iPhone® and iPad®
- Easily communicate problems or prove repairs were made with Smartview® analysis and reporting software, included
- Fast and convenient operation using either rugged touch screen or optimized tactile button menu navigation
- High-temperature measurement (up to 1200°C on the Ti400)
- Discover and report problems faster and easier with IR-Fusion® Technology with Autoblend™ Mode
- Work in the most demanding environments with Torture Tested™ legendary Fluke ruggedness and reliability
- See infrared images live, in real time, with streaming HDMI video
- No need to carry pen and paper any more with voice recording IR-Photonotes™ photo annotation system
- Be ready for any situation with optional wide angle and telephoto interchangeable lenses
- Includes: Convenience of patented field-changeable, rechargeable smart batteries with charge level indicators

VT02 Visual IR Thermometers

- Combines the convenience of a spot thermometer with the visual advantage of a thermal imager
- The ultimate in between tool for those times when a single infrared temperature reading is not enough and a high-resolution thermal image is more than what is needed
- Hot and cold spot markers: available in visual, infrared and blended views
- Temperature measurement range: -10°C to +250°C (14°F to 482°F)
- Accuracy: +/- 2°C or 2% (at 25°C nominal, whichever is greater)
- Thermal and visual image blending: 0 to 100% blend, shown in 25% increments
- Field of view: 20° x 20°
- Focus system: focus free
- Storage medium: up to 10,000 images stored on micro-SD card, easy download to PC and import into software
- (4) Standard AA cell batteries, for (8) hours of continuous battery life
- Includes Smartview® analysis and reporting software
- Utilizes hyper-thin pyroelectric array technology

3367863	FLK-VT02	VT02 Visual IR Thermometer

VT04 Visual IR Thermometers

- Built-in digital camera - only Fluke Visual IR Thermometers offer this as a standard feature
- Exclusive thermal heat map blending overlay - with one button, blend digital and thermal images to instantly show the exact location of the issue
- No training required - fully automatic with built-in intelligence
- True pocket-size design - 40% smaller than entry level infrared cameras
- Smartview® Reporting Software - store up to 10,000 images per GB on included 4 GB SD card and make professional reports on included professional software
- Powerful resolution with Pyroblend™ Plus Optics
 - Best-in-class field of view: 28° x 28° (40% wider for tight spaces)
 - 4 Times sharper images
- Alarm and time lapse features:
 - Hi/Lo temperature alarm - find hot spots in seconds with the alarm feature
 - Time lapse image capture - automatically monitor equipment over time
 - Automated monitoring alarm - automatically capture images after an alarm has been triggered
- Automatic hot and cold spot trackers
- Breakthrough affordability - fraction of the cost of infrared cameras that require costly training and software

568 Two-In-One Infrared & Contact Thermometer

- Access advanced features with soft-key buttons and dot-matrix display
- Compatible with all standard miniconnector Type K thermocouples
- Adjustable emissivity feature, including built-in material table
- Captures up to 99 points of data
- 2 Levels of backlight
- Audible and visual alarms
- MIN, MAX, AVG, and DIF functions
- Type-K thermocouple bead probe included
- 1% Measurement accuracy
- Versatile interface with 6 language options
- Included:
 - IR Thermometer (568)
 - Thermocouple K bead probe
 - Hard carrying case
 - (2) AA Alkaline batteries
 - Getting started guide (in 6 languages)
 - Users manual on CD (in 6 languages)

NEW 430 Series II Three-Phase Power Quality Analyzer

- Patented energy loss management
- Realtime PowerWave data capture
- Highest safety rating in the industry
- Automatic transient mode
- Troubleshoot real-time
- Measure all three phases and neutral
- Measures voltage, current, dips, swells, interruptions, harmonics, power, energy loss monitization, frequency, inrush and power inverter efficiency

Fluke 754 Calibrator

- Calibrate temperature, pressure, voltage, current, resistance and frequency instruments
- Built-in procedures for transmitters, square root transmitters, pressure and temperature switches
- Simultaneously measure and source
- Automatically capture calibration results
- Document procedures and results to meet ISO 9000, EPA, FDA, OSHA and other requirements
- Measure/simulate (13) types of thermocouples and (8) RTDs
- Store up to 8,000 readings in data logging mode
- Protected against dirt, dust and moisture; unaffected by vibration
- Includes a USB interface
- Operate in English, French, German, Italian and Spanish

Fluke 810 Vibration Tester

- Determine root cause, location and severity of common mechanical faults
- Prioritize and plan equipment repair or replacement
- Deploy maintenance resources at the point of greatest impact
- Locate and diagnose common mechanical problems
- Includes:
 - Tri-axial accelerometer with quick-disconnect accelerometer cable
 - Magnet mount and mounting pad kit with adhesive
 - Laser tachometer with storage pouch
 - Battery pack with cable and adapters
 - Shoulder strap and adjustable hand strap
 - Viewer PC software
 - Mini USB to USB cable
 - Carrying case
 - Training DVD and user manual on DVD
 - Getting started guide and quick reference guide

1555 and 1550C Insulation Resistance Tester

- Test voltages up to 10 kV provides solutions for all applications
- Warning function alerts that line voltage is present
- Gives voltage reading up to 600 V AC or DC for increased safety
- Measurements can be stored in up to 99 memory locations
- Long battery life gives over 750 tests between charges
- Automatic calculation of Dielectric Absorption (DAR) and Polarization Index (PI) with no additional setup
- Guard system eliminates the effect of surface leakage current on high-resistance measurements
- Large digital/analog LCD for easy viewing
- Capacitance and leakage current measurement
- Ramp function for breakdown testing

Fluke 1625 and 1623 GEO Earth Ground Tester

- 3 and 4-Pole earth ground measurement
- 4-Pole soil resistivity testing
- 2-Pole resistance measurement AC
- Selective testing, no disconnection of ground conductor (1 clamp)
- Stakeless testing, quick ground loop testing (2 clamps)
- 2-Year warranty
- 1623 Includes:
 - 1-Button measurement concept
 - Measuring frequency 128Hz
- 1625 Includes:
 - 2 and 4-Pole resistance measurement DC
 - Earth impedance measurement at 55Hz
 - Automatic frequency control (AFC) 94Hz to 128Hz
 - Measuring voltage switchable 20V/48V
 - Programmable limits, settings
 - Continuity with buzzer
- Kit includes:
 - Test leads
 - Alligator clips
 - Stake/reel set 4-pole
 - Selective/stakeless clamp set
 - Rugged carrying case
 - Users manual

Electrical Test Equipment and Meters

1630 Earth Ground Clamp Meter

- Suited for:
 - Ground loop checks on any earthing system
 - Continuity tests on earth bonding circuits and connections
 - Inspection of lightning protection systems
 - Leakage current measurement for troubleshooting on earth ground systems
- Wide ground loop resistance range, from 0.025 ohms to 1500 ohms
- Large 35mm (1.38 in) jaw opening for tests on ground conductors and/or equipotential bus bars
- Measurement of ground leakage current, from 0.2mA to 1000mA, without needing to disconnect
- Wide AC current measurement range from 0.2A to 30A for multiple applications
- Continuity loop test with audible alarm
- User-defined high/low alarm limits
- "Display-Hold" button for capturing readings in hard-to-reach places
- Memory function automatically records and stores measured values
- Automatic self-calibration ensures correct measurement
- Includes:
 - Carrying case with shoulder strap
 - Resistance test loop
 - 9V Battery
 - Users manual

HD110C IP67 Heavy Duty Multimeter

- Measures 1500 VDC
- Constructed with drop-resistant housing and PCB mounting
- Magne-Grip™ holster with magnetic hanging strap
- Includes high voltage test leads with threaded alligator clips
- 3-1/2 Digit LCD display, 1999 counts, with annunciators
- Automatic polarity indication
- Low battery indication
- Standard 9 V battery, NEDA 1604, JIS 006P, IEC 6F2
- Flame retardant, high-impact thermoplastic case
- CAT IV 1000 V
- IP67 Rated

ACD-6 PRO Digital Clamp Meter

- High-current clamp, doubles as multimeter for AC/DC voltage, resistance and continuity
- Auto and manual ranging
- Continuity beeper
- Relative zero mode
- Auto power off
- Data hold
- Large, easy to read LCD display
- Diode test
- Audible continuity
- Accommodates conductors up to 1.77 (45mm) in diameter
- Carrying case and batteries included

3107949	ACD-6 PRO	600V AC/DC Clamp Meter

TIC 300 PRO High Voltage Detector

- For checking transmission lines, power distribution equipment, down power lines, fuses and load break connectors
- Lower voltage setting for checking voltage presence in breaker panels, breakers, power outlets and wiring
- Verifies presence of voltage from 30V AC to 122,000V AC
- Non-contact AV voltage detection
- Visual and audible voltage indication
- Used with Hot Stick (TIC 410A) for voltage higher than 1500V AC

87-5 Digital Multimeter

- **Measures:**
 - 1,000V AC/DC
 - 10A AC/DC
 - Resistance
 - Capacitance
 - Frequency
- **Includes:**
 - Test leads (TL75)
 - Alligator clips (AC70A)
 - Protective holster with Flex Stand
 - 9V Battery (installed)
 - Getting Started Manual
 - Detailed manual with CD
- **Built-in thermometer**
- **Low-pass filter for drives/noise**
- **Large digit display with bright two-level backlight**
- **Captures fast transients**
- **0.05% DC Accuracy**
- **Temperature range: -20° to 55°C**

2847703	FLUKE-87-5	6,000 Digital Display/Count

113 Utility Digital Multimeter

- **VCHEK™ LoZ Low impedance measurement**
- **True-rms measurement**
- **Record signal fluctuations using the min/max function**
- **Diode test**
- **Integral holster with probe holders**
- **Auto and manual ranging**
- **Meets measurement category CAT III 600V and category IV 300V standards**
- **Maximum voltage: 600V**
- **Operating temperature: -10°C to 50°C**
- **Includes:**
 - Utility multimeter (113)
 - Test leads (TL75)
 - (1) 9V Battery
 - Users manual

117 Electricians Multimeter with Non-Contact Voltage

- **Choice for commercial applications**
- **VoltAlert™ technology for non-contact voltage detection**
- **AutoVolt automatic AC/DC Selection**
- **Low input impedance**
- **True RMS for accurate measurements on non-linear loads**
- **Measures:**
 - 60V AC/DC
 - 20A AC/DC
 - Resistance
 - Continuity
 - Frequency
 - Capacitance
- **Min/Max/Average with elapsed time to record signal fluctuations**
- **Compact ergonomic design for one-handed operation**
- **Compatible with optional magnetic hanger for hands free operation**
- **CAT III 600V Safety rated**
- **Temperature range: -10° to 50°C**
- **Includes:**
 - 4mm Silicone test lead set
 - Holster
 - Manual

233 True RMS Remote Display Multimeter

- Removable display allows remote display 30' away from measurement point
- Measures:
 - 1,000V AC/DC
 - 10A AC/DC
 - Continuity
 - Diodes
 - Resistance
 - Frequency
- Built-in thermometer
- Temperature range: -40°C to 400°C
- Auto power off
- Includes:
 - Test leads
 - Alligator clips
 - Temperature probe (80BK-A)
 - Manual
 - CD-Rom
 - (5) AA Alkaline batteries

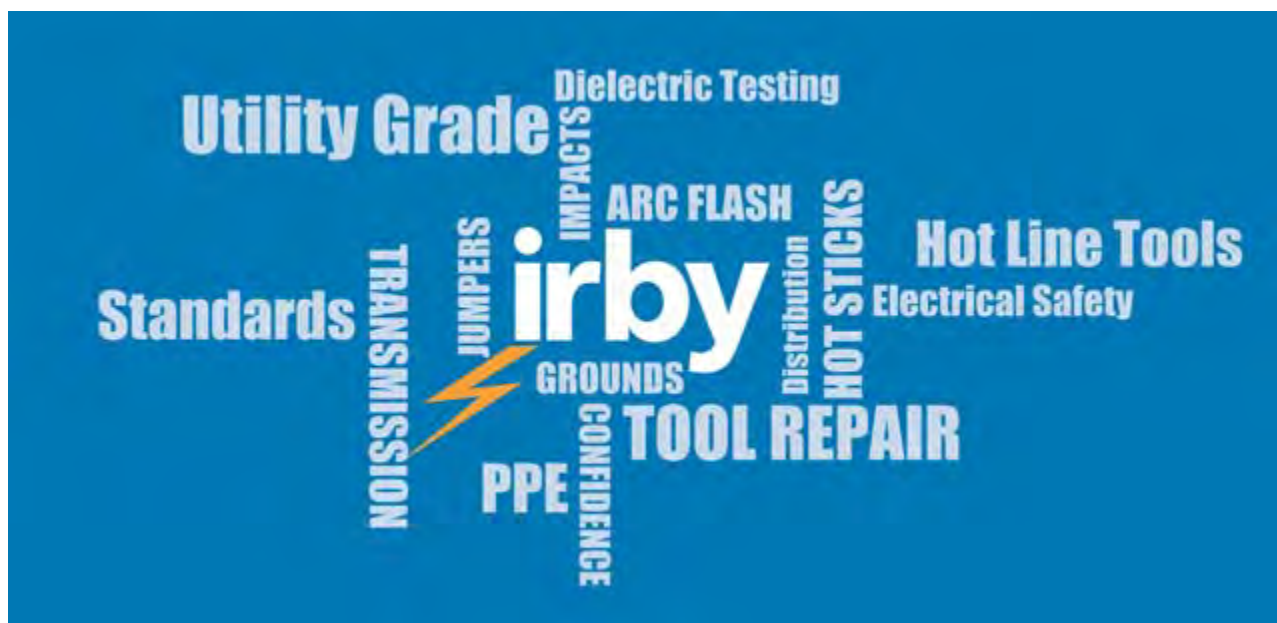

289 True RMS Logging Multimeter with TrendCapture

- Logging function with expanded memory for unattended monitoring of signals over time
- Save multiple logging sessions before PC download is necessary
- (2) Terminal 50 ohm range with 1 milliohm resolution, 10mA source current
- Low pass filter for accurate voltage and frequency measurements on adjustable speed motor drives and other electrically noisy equipment
- Measures:
 - 1,000V AC/DC
 - 10A AC/DC
 - Resistance
 - Capacitance
 - Frequency
- LoZ Volts
- On board help screen
- Real time clock
- Withstands hazardous 8,000V spikes caused by load switching and faults on industrial circuits
- Temperature range: -200°C to 1350°C
- Includes:
 - Silicone test leads (TL71)
 - Probe holder
 - (2) Alligator Clips (AC72)
 - (6) AA Alkaline batteries (installed)

Electrical Test Equipment and Meters

770 Series mA Process Clamp Meter

- Measure 4-20 mA signals without "breaking the loop"
- Soft carrying case, users manual
- Fluke 772 and 773:
 - Source 4-20 mA signals for testing control system I/O or I/Ps
 - Simulate 4-20 mA signals for testing control system I/O
 - Measure 4-20 mA signals with in-circuit measurement
 - Power a transmitter with the 24V loop power supply
 - Automatically ramp and step change the 4-20 mA output for remote testing
- Fluke 773:
 - Measure DC voltage to verify 24V power supplies or voltage I/O signals
 - Source DC voltage to test voltage input devices
 - Scaled mA output signal enables a logging DMM (289) to record 4-20 mA signal without breaking the loop
 - mA in/out: simultaneously source a mA signal while measuring a mA signal with the clamp

M12™ 160 X 120 Thermal Imager Kit

- Capture thermal and visual images on each trigger pull for enhanced reporting
- Crisp, high resolution 160 x 120 pixel thermal images for better definition and clarity
- Complete report software to easily analyze images
- Broader temperature range (-10 to 350°C) to cover more applications
- 5X Faster battery charge over closest competitor
- 3.5" High resolution LCD (640x480 pixel) for easier troubleshooting
- Built-in visual camera and flashlight for improved analysis
- Knurled focus ring is easy to grip with arc flash PPE
- Media door seals the included 2GB SD card and USB connectors
- Includes:
 - 2GB SD Card, M12™ REDLITHIUM™ battery, M12™ battery charger
 - Carrying case, quick reference guide, SD card reader
 - Software manual, thermal imager manual, thermal imager report software, USB cable

CM-660 AC Clamp-On Meter

- Auto power off for longer battery life
- Amperage measurement: 600A AC
- Voltage measurement: 600V
- Display: 3-1/2 digit LCD, 2,000 count
- Resistance: 2,000 OHM
- Jaw opening: 1.38"
- Measurement category: CAT III, 600V
- Includes: 9V battery, test leads, carrying case

DM-820A Digital Multimeter

- Crest capture (peak hold) plus recording of max, min, max-min and average
- Two voltage detection modes - non-contact or using a single test lead
- One temperature measurement using a type K thermocouple
- Conductance measurement
- Measurement category CATIV, 1000V
- Includes: 9V battery, bead temperature probe, test leads, protective boot, carrying case

Irby #	Mfg #	Description
3362409	DM-820A	Digital Multimeter

NEW DM-860A Digital Multimeter

- AC+DC True RMS, 50,000-count display for greater accuracy
- Performs resistance, conductance, frequency, duty cycle, temperature and capacitance measurements, plus diode and continuity tests
- Bright backlit display is easy to read under any light condition
- Measurement category CATIV, 1000V
- Includes: 9V battery, bead temperature probe, test leads, protective boot, carrying case

Electrical Test Equipment and Meters

Multi-Range Voltage Detectors, Analog

- Confirms a line is de-energized
- Calibrated to read approximate line-to-line voltage when connected to any phase conductor
- Gives metered readout capable of distinguishing actual line voltage from static or feedover from an adjacent line

Irby #	Mfg #	Description
41892	C4030979	1 - 40 kV Scales Voltage Detector (Includes Test Point)
41213	C4031140	16 - 161 kV Scales Voltage Detector

Multi-Range Voltage Detectors, Analog

- For overhead and URD systems to 40kV
- With TP setting for test point on URD elbows
- Test both overhead and underground distribution systems
- For systems in voltage classes from 5 through 40kV
- Interchangeable probes and adapters
- Furnished owner's manual illustrates operating details for all models
- Includes:
 - Multi-Range voltage detector
 - Hook and straight probes
 - Elbows and bushing adapters
 - Case

61777	T4032271	5-40 kV Multi-Range Voltage Detector

Distribution Auto-Ranging Voltage Indicators (ARVI)

- 600V to 69kV for overhead and underground
- Automatic-ranging function quickly displays approximate line-to-line voltage class
- Single pushbutton activates the instrument
- Single light indicates power on (by glowing solid) or low battery (by blinking)
- C4033374 Includes:
 - Tester unit
 - Shepherd hook probe
 - Instruction manual
 - Hard shell padded case
- T4033418 Includes:
 - Tester unit
 - Shepherd hook probe
 - Elbow adapter
 - Bushing adapter
 - Voltage indicator tester
 - Instruction manual
 - Hard shell padded case

Wet/Dry Hot Stick Testers

- Portable unit
- Wet and dry modes selected by a toggle switch
- Graduated meter gives precise readout of each tool's leakage current
- For testing any length fiberglass-reinforced plastic hot stick up to 3" in diameter
- For spot checks at field jobsites or periodic diagnostics in workshop

Irby #	Mfg #	Description
53631	C4033178	115V Wet/Dry Hot Stick Tester

Protective Grounding Tester Set

- Used to check resistance in protective grounding sets
- Applies direct current across the test specimen
- Instruction video and manual includes procedure details
- Includes:
 - Self-contained carry case
 - (2) Ball-stud terminals
 - DVD Demonstration video
 - (2) Trouble-shooting probes
 - Self-test cable

Irby #	Mfg #	Description
46691	C4033220	115/120V Protective-Ground-Set Tester

Transformer and Capacitor Tester

- Test new transformers and capacitors, plus troubleshoot in-service units
- Eliminates the blowing of cutout fuses to determine the condition of equipment
- Magnetized back allows hands to be free to install and remove cables and clips.
- Weatherproof, high-impact resistant plastic housing
- Operates on 9V battery, included

Electrical Test Equipment and Meters

Digital Voltage Phasing Meter

- Instrument for measuring overhead and underground voltages
- AC, Hi-Pot and DC
- Large easy-to-read digital meter and analog bar graph
- Coiled, self-retracting cable; 16" retracted and 10' when fully extended
- Meter reads to nearest 100 volts
- Kit includes: 6702 Voltmeter with case, (2) 6' universal fiberglass poles with carrying case

Irby #	Mfg #	Description

448914	6711	0-40 kV Digital Meter Kit

Regulator Neutral Detector

- Eliminates high or low voltages caused by cycling the regulator to the upper or lower limit and then counting steps back to neutral
- 0-2000V range is shown in one volt increments
- Works with all regulators up to and including 34.5kV
- Contact electrodes are knurled to aid in contact with conductors

Irby #	Mfg #	Description
73890	6709-1	Regulator Neutral Detector

Phase-Tell III Wireless Phasing Meter

- Used to determine phase relationships on three-phase power systems, overhead and URD applications
- Battery powered, two-piece wireless phasing tool
- Wireless units communicate up to 300' apart
- Voltage range 4kV to 500kV
- Operates on two "AA" batteries, included
- FCC Compliant
- Auto shut-off
- Includes carrying case and instructions

Irby #	Mfg #	Description
3158244	6722	Phase-Tell III Wireless Phasing Meter
74686	266	URD Bushing Well Adapter
3158247	01-266	Padded Case for Bushing Adapters

Electrical Test Equipment and Meters

Analog Voltage Detector

- Dual application design
- Detects 0-40kV line to ground (0-69kV phase to phase)
- A proximity or direct contact on overhead and underground systems
- Detect voltage from the ground on bare overhead and underground systems
- Test secondary voltage on bare or insulated cables
- Test capacitive test points
- Indicates line to ground values for nominal or induced voltages
- 5-Position selector switch is calibrated for height above ground to compensate for a capacitive coupling effect
- Shielded to minimize stray field interference
- Overload protection up to 500kV
- Water resistant construction
- Contained in a highly durable carrying case

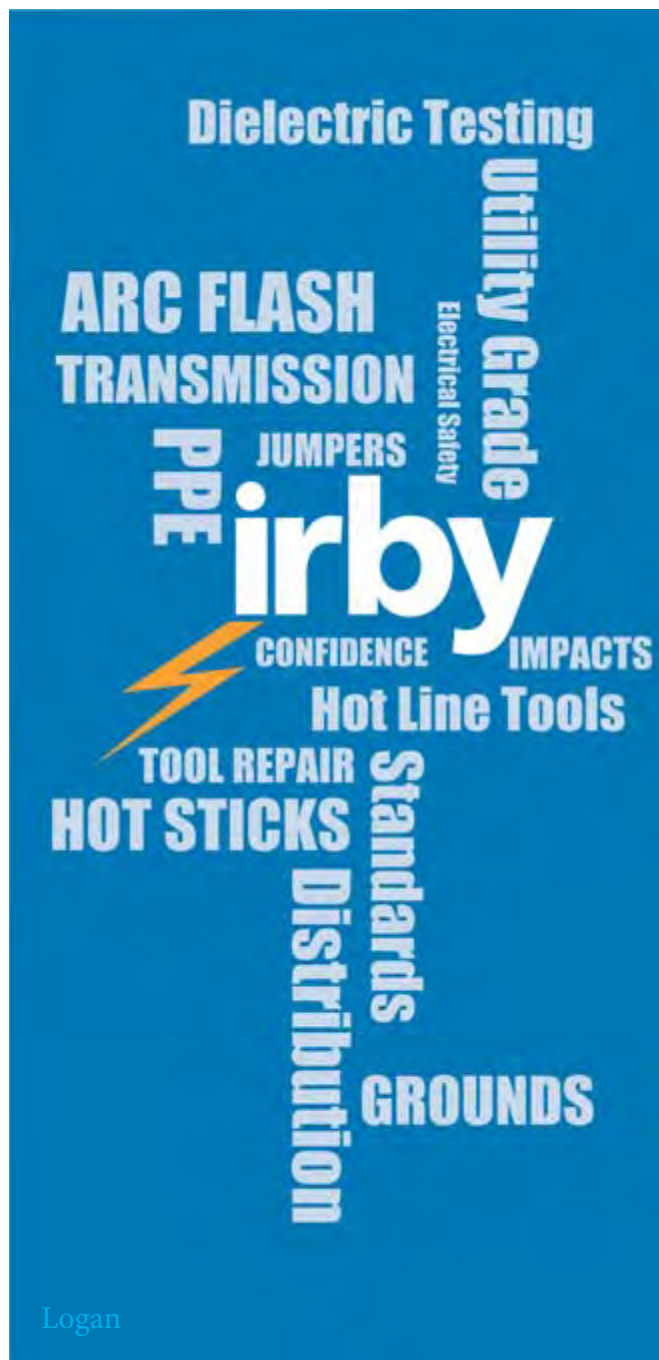

Irby #	Mfg #	Description
3218679	VDA040P	0-40kV Analog Voltage Detector

Cordless Digital Phasing Meter

- FCC Licensed wireless technology
- Large easy-to-read digital display with backlight
- High intensity color coded LED indicator lights
- Impact and water resistant construction
- Completely shielded to minimize stray field interference
- Direct contact from 120V to 69kV, distribution systems
- Non-contact from 69kV to 800 kV, transmission/substation systems
- Automatically alerts user of a delta/wye transformation by an indicator light blinking
- Operating range of 100'
- Contained in a highly durable padded carrying case

The Mega Beast Digital Service Conductor Tester

- 3-Wire, 120V
- 80A Artificial unbalanced load
- Rugged, fully portable and self-contained
- Built-in short circuit and fire protection
- Can be used to load transformers for diagnostic testing and loading CT meters for installation testing and meter accuracy
- Load elements: 8 each, 1600W, 125VAC
- Base connectors: standard KWH meter
- Size: 18-1/2"L x 15-1/4"W x 6-7/8"D
- Heavy-Duty case made from black structural resin, (3) air inlets and (8) air outlets
- 1-Year parts and labor warranty

 - Telephone lines
 - Distribution lines
 - Transmission lines
 - Cable television
 - Street lights
 - Sag (lowest point to ground)
 - Separation between up to six cables
- Simple, 3-button operation
- Compact size; lightweight and handheld
- No physical connection to cables or wires required
- Low battery indicator
- Calibration and maintenance free operation
- Pre-selectable measuring modes, will read in either meters or feet and inches
- 75' Maximum height power application

Digital Earth Clamp

- Large elliptical clamp shape
- Smooth mating surfaces on the clamp head
- CATIV 600 V operation
- Measures ground resistance from 0.05 to 1500 Ohms
- Measures true RMS ground leakage current from 0.5mA rms to 35A rms
- Noise filter function
- Resistance and current limit alarm functions
- Ergonomic trigger design
- Backlit LCD display
- Stores results for later on-screen recall
- Advanced memory functionality with download
- Megger PowerDB/PowerDB Lite™ compatible

NEW Handheld High-Current Micro-Ohmmeter

- Designed to measure the resistance of circuit breaker contacts, bus-bar joints and other high-current links
- Battery powered
- Lightweight - 1 kg
- DualGround™ Safe test
- Auto range: 1 to 1,000 Micro-Ohms
- Bluetooth® PC communication
- Complies with IEEE and IEC standards
- Up to 240A

5050, 5060, 5070 Megohmmeter

- True Megohmmeter®
- Test voltage combination of 500V, 1,000V, 2,500V and 5,000V
- Insulation measurements from 30K Ohm to 10T Ohm
- Adjustable and programmable test voltage (40 to 5,100V)
- Automatic calculation of DAR, PI and DD values
- Direct measurement and display of capacitance and leakage current
- Display resistance, test voltage and run time
- Programmable test run times and PI ratio times
- Smooth and alarm functions
- Automatic test inhibition if live sample
- Automatic discharge and display of discharge voltage
- Large dual display with time, voltage and measurements shown
- Rugged weatherproof field case
- RS-232 Interface for direct printing of results (5060, 5070)
- 128kB Memory for storing field test data (5050-4KB)
- Remote operation from PC (5060, 5070)
- Includes DataView® software (5060, 5070)

6416, 6417 Clamp-On Ground Resistance Tester

- Touch voltage indication (warns of unsafe conditions)
- Direct reading of ground resistance from 0.01 Ohm to 1,500 Ohm
- Direct reading of continuity and ground loop resistance
- Direct reading of ground leakage or phase current from 2mA to 40A rms
- Jaw design with large 1-1/4" window, accommodates up to 1,000kcmil cables
- Auto-off for power management
- Rugged Lexan head and body construction resists breakage
- Bluetooth communication with Android App (6417)

PEL100 Series Power and Energy Loggers

- Economical, compact and simple to use
- Measures and records power consumption and cost
- Supports (17) different network hook-ups
- True four quadrant power calculations
- 600V CAT IV and satisfies NEC 220.87 requirements
- Five ways to obtain power information by backlit LCD display, removable SD card, USB, Bluetooth Class 1 and Ethernet
- Includes: Free DataView® Software for data storage, real time display, analysis and report generation
- Backlit digital display (PEL103)

Powerheart® AED G3 Automatic Defibrillator

- Rescue Ready® and STAR® biphasic technology to make rescue as simple as possible
- Clear and simple voice prompts, designed for lay rescuers
- Defibrillation therapy is automatically delivered giving life-saving shock as quick as possible
- Digital text screen assists rescuers in noisy, chaotic environments
- Includes:
 - (1) AED
 - (1) Battery (9146)
 - (2) Pairs of adult non-polarized defibrillation pads
 - (1) Carrying case
 - (1) Ready kit
 - (1) Quick start tool kit
- 7-Year warranty on AED
- 4-Year warranty on battery

- Collect and analyze load profiles
- Patented open CT sensor with $\pm 1\%$ accuracy
- Range of operation, voltage: 69kV, current: 1-1000A
- Softlink interface for data analysis
- Shock and water resistant housing
- Easily clamps to line in seconds
- Recorded data downloads into user's PC
- Sensor opening 1.3"
- Generate reports and create graphs for profile analysis
- Includes:
 - (3) Amcorders
 - IrDA Serial cable
 - Softlink software
 - Carrying case

14969	44030	Phase Sequence Rotation Meter
14970	44050	Cordura Carry Case (Sold Separately)

Transformer & Capacitor Testers

- Tests transformers and capacitors for major defects before energizing
- Tests overhead, pad-mount and other distribution transformers as well as capacitors and capacitor banks
- Tests the primary and secondary sides of de-energized transformers without disconnecting
- Prevents line workers from installing a fuse on a shorted transformer or capacitor
- Quickly verifies the secondary connections are not shorted
- Compact, lightweight and easy-to-use
- Powered by a 9V alkaline battery
- Super bright LED indicators
- Audible alarm confirms successful test
- Continuous testing while button is pressed
- Includes:
 - Large copper alligator clips with heavy-duty boots
 - Heavy-duty rubber insulated coiled test leads

V-Watch Personal Voltage Detector

- Alerts user to proximity of high voltage
- Audible and visual alarms increase in frequency the closer the user gets to energized equipment
- Typical initial warning distance is about 7' from a 4kVAC conductor
- Low battery indicator
- Field replacement 9V battery
- Rugged protective housing
- Built-in self-test
- Operating temperature: -20TM to 120°F
- Water withstand: protected from falling rain per IEC-529, level 2
- Voltage range: 2400VAC line-to-ground and above

Advantage Model R CI Laser Rangefinder

- Our most popular model, the AdvantageTM R is our "R"ugged field rangefinder featuring a tough, GE Lexan ABS alloy housing able to withstand nature and its surroundings and keeps on measuring with extreme accuracy
- With rubber bumpers and a protected Head Up Display (HUD) aiming sight, the R is a "go anywhere, do anything" precision instrument
- Reflector/reflectorless operation
- Use freehand or on a tripod
- Serial data output
- Compatible with most GPS systems
- Long range capabilities
- Includes:
 - (1) Advantage R CI Laser Rangefinder
 - (1) Internal compass and inclinometer
 - (1) Rechargeable Ni-MH tripod battery handle
 - (1) Softside carry case
 - (1) 120VAC Charging cord
 - (1) User manual

Electrical Test Equipment and Meters

Radiodetection Locators Feature:

- **Application specific products** - SL, DL, TL and PL for construction, gas, water, sewer, telecoms and power industries.
- **Sonde Detection** - Enables pipe location at depths of up to (15) meters (50').
- **TruDepth™** - Indicates depth when the locator is oriented correctly above the target for the most accurate reading.
- **StrikeAlert™** - Alerts the operator to the presence of shallow power cables.
- **High Frequency Location** - Pinpoint and locate high impedance cables.
- **Depth in Power Mode** - Allows depth measurements without using a transmitter.
- **8K Fault-Finding** - Locate cable sheath faults to within (1) meter (3') using Radiodetection's accessory A-Frame.
- **Dynamic Overload Protection** - Allows use of locator in areas where excessive signals are present.
- **Fully Digital Platform** - Patented Triband design provides unparalleled flexibility of power, frequency and control.
- **Range of Transmitters** - (1) Watt, (3) Watt and (10) Watt power ratings and features suitable for a broad range of applications.
- **Robust** - Constant current delivered from 200Hz to 200kHz meets the highest demands of reliability and performance.
- **Up to (10) Watt Output** - For locating deep and long distance cables and pipes.

RD7000™+PL Power Industry: (Continued) >Radiodetection

- *Designed for use in areas where excessive magnetic fields, generated by high voltage equipment and cables can prevent accurate locating*
- *Dynamic overload protection reduces this effect, allowing uncompromised locator accuracy*
- *Has both Peak and Null modes and also a combined Peak/Null mode which allows the identification of signal/ground distortion effects by displaying both Peak and Null response simultaneously*
- *Can indicate depth in Power mode, particularly useful when direct connection of a transmitter to a power cable may be hazardous or impractical*
- *To further assist the operator to locate cable sheath faults, 8KFF is a patented technique that locates a cable fault using an A-frame attached to the Locator*
- *On-screen arrows help show the fault's direction and help the operator locate the fault accurately to within one meter*
- *Features: TruDepth™, Peak Mode, Null Mode, Peak/Null Mode, StrikeAlert™, Centros™, eCAL™, Depth on power, 8KFF, Dynamic overload protection*

RD7000™+ Precision Locators >Radiodetection

RD7000™+DL - Water and Pipeline Industry:

- *Specifically designed to detect not only active and passive frequencies but also (3) different sonde signals*
- *Ideal product for standard cable and pipe location*
- *Ideal for locating deep, underground dirty water pipes and drains and where the pipe material does not allow the use of standard locating technology but where sondes can be deployed*
- *Different sonde frequencies allow the RD7000™+DL to locate pipes made from a wide variety of materials including: cast iron, plastic (PE), clay, fiber, concrete and brick*
- *Features: TruDepth™, Peak Mode, Peak/Null Mode, StrikeAlert™, Centros™ and eCAL™*

RD7000™+PL Power Industry:

- *One of the biggest challenges to technicians working in the power industry is locating pipes and cables when operating near high voltage environments, such as substations and conduits where the presence of large signals overpower most locators*

IRBY offers one of the best hard hat programs in the industry. It has never been easier to customize your hard hat or cap.

- **Quality Printing** Customized hard hats present your logo in the highest quality. Logos are permanent and will not peel, crack or fade like a decal or sticker.
- **Order Size** There's only a (20) piece minimum order required for custom logo work!
- **Delivery** IRBY offers some of the fastest delivery in the industry.
- **Vivid Colors** Advanced print technology allows for crisp, clear logos.
- **Striping** Factory installable Scotchlite® stripes offer improved visibility.
- **More Information** See the Bullard and MSA Order Forms in the Reference Section at the end of the catalog, or contact your local IRBY sales rep or branch.

Safety Warnings

- Face Shields: Steel screen visor (SV-70) complies with ANSI Z87, but provides high mass impact protection not high velocity protection. Nylon screen visor (NV-70) is a convenience shield and does not comply with ANSI Z87. For high velocity protection, choose Lexan® face shield which meets high velocity requirements. Note: ANSI Z87 requires separate eye protection, suitable for the situation, in addition to any face shield.
- Dielectric Models: (non-ventilated) are non-conducting rated Class E; ventilated models should not be used where electrical hazards exist. Dielectric models have a nylon screen visor (NV-70), while the ventilated models have a steel mesh visor (SV-70).

PROTECTIVE RUBBER EQUIPMENT LABELING CHART

Rubber insulating gloves are available in six ASTM defined voltage classes. Rubber dipped sleeves are available in Class 0 through 4. The chart identifies the class, proof test voltage and maximum allowable exposure voltage

Class Color	Proof Test Voltage AC / DC	Max. Use Voltage* AC / DC	Rubber Molded Products Label	Insulating Rubber Glove Label	Insulating Rubber Dipped Sleeve Label
00 Beige	2,500 / 10,000	500 / 750		10 SALISBURY ANSI / ASTM D120 CLASS 00 MAX USE VOLT 900V AC	
0 Red	5,000 / 20,000	1,000 / 1,500		10 SALISBURY ANSI / ASTM D120 CLASS 0 MAX USE VOLT 1000V AC	
1 White	10,000 / 40,000	7,500 / 11,250		10 SALISBURY ANSI / ASTM D120 CLASS 1 MAX USE VOLT 7500V AC	
2 Yellow	20,000 / 50,000	17,000 / 25,500		10 SALISBURY ANSI / ASTM D120 CLASS 2 MAX USE VOLT 17000V AC	
3 Green	30,000 / 60,000	26,500 / 39,750		10 SALISBURY ANSI / ASTM D120 CLASS 3 MAX USE VOLT 26500V AC	
4 Orange	40,000 / 70,000	36,000 / 54,000		10 SALISBURY ANSI / ASTM D120 CLASS 4 MAX USE VOLT 36000V AC	

* Max Use Voltage when worn with leather protectors. Insulating Gloves and sleeves must have a color coded label to meet appropriate ASTM Specifications.

GLOVE SIZING

Proper fit is important. To determine glove size, measure the circumference around the palm (Example: If measurement is 9" you would need size 9 glove). Allow for additional room if fabric glove liners are to be worn, especially with thermal liners.

Measure the circumference around the palm

ENSURE YOUR PPE FITS FOR SAFETY AND COMFORT LEATHER PROTECTOR AND SLEEVE SIZING

LEATHER PROTECTOR SIZING

Minimum Distance from Protector and Rubber Glove	Glove Class	Leather Protector Cuff
		----- Cuff Line -----
00, 0		1/2" from cuff
1	1/2	1" from cuff
2	1	2" from cuff
3	2	3" from cuff
4	3	4" from cuff

LEATHER PROTECTOR GLOVES should always be worn over Rubber Insulating Gloves to provide the needed mechanical protection against cuts, abrasions and punctures.

The Clearance Table shows the minimum distance which shall be allowed between the protector glove cuff and the bead of the rubber glove per ASTM F496 Specifications.

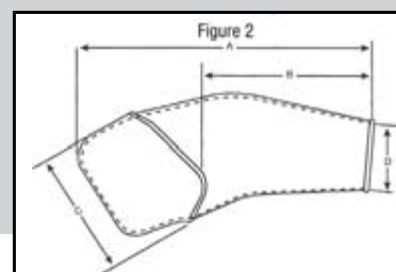

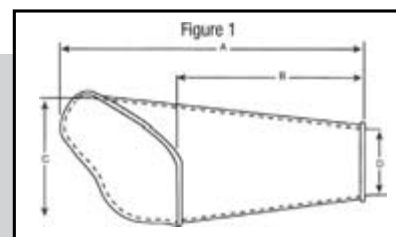

WARNING: DO NOT USE LEATHER PROTECTORS ALONE FOR PROTECTION AGAINST ELECTRIC SHOCK. SERIOUS INJURY OR DEATH WILL RESULT. ALWAYS USE A PROPERLY RATED INSULATING GLOVE FOR THE VOLTAGE BEING WORKED.

SLEEVE SIZING

Sleeves should be selected to fit the arm comfortably, covering from the top of the shoulder to inside the top of the glove. To minimize the possibility of the sleeves pushing gloves off the hand, size the sleeve to the shortest length possible while maintaining complete coverage to the shoulder.

HRC Hazard Risk Category Chart

Hazard Risk Category Chart based on NFPA 70E

All information and standards are based on the National Fire Protection Association known as NFPA.

The HRC is used to determine the necessary arc rating of a garment worn during a given job task. Wearing multiple layers of clothing may be required to obtain the necessary rating required for your job. Only your employer can tell you the required level of protection required for your job.

The NFPA has identified four F hazardous risk category levels, which are numbered by severity from 1 to 4. Hazard Risk Category is the level of arc flash protection clothing you must wear to protect against a minimum level of incident energy measured in calories per centimeter squared. Meaning, electrical equipment, depending upon the energy delivering capability, under fault conditions can cause an explosion, or arc fault of a certain level, again measured in calories per centimeter squared. That explosion can deliver a certain amount of heat to a certain distance. Each level, 0 - 4, is rated at a certain amount of flame resistance, again measured in cal/cm².

HAZARD / RISK CATEGORY	CLOTHING DESCRIPTION (Typical number of clothing layers is given)	REQUIRED MINIMUM Arc Rating of PPE cal/cm ²
 1 HRC	Arc-rated FR shirt and FR pants or FR coverall (1 layer)	4
 2 HRC	Arc-rated FR shirt and FR pants or FR coverall (1 or 2 layers)	8
 3 HRC	Arc-rated FR shirt and FR pants or FR coverall, and arc flash suit selected so that the system arc rating meets the required minimum (2 or 3 layers)	25
 4 HRC	Arc-rated FR shirt and FR pants or FR coverall, and arc flash suit selected so that the system arc rating meets the required minimum (3 or more layers)	40

Arc Flash: An explosive release of energy caused by an electrical arc. An arc flash results from either a phase to ground or a phase to phase fault caused by such occurrences as accidental contact with electrical systems, build up of conductive dust, corrosion, dropped tools, and improper work procedures. During an arc flash, the temperature can reach 35,000° Fahrenheit, and exposure to an arc flash can result in serious burn injury and death. Every year, more than 2,000 people are admitted to burn centers with severe arc-flash burns.

Arc Rating: A value of the energy necessary to pass through any given fabric to cause with 50% probability a second or third degree burn. This value is measured in calories/cm². The necessary Arc Rating for an article of clothing is determined by a Hazard/Risk Assessment and the resulting HRC. Usually measured in terms of ATPV or EBT.

Calorie: The energy required to raise one gram of water one degree Celsius at one atmosphere pressure. Second-degree burns occur at 1.2 calories per centimeter squared per second (cal/cm²).

Flash Hazard: A dangerous condition caused by the release of energy from an electric arc.

Flash Hazard Analysis: A study investigating the potential exposure to arc-flash energy that a worker faces while performing a specific job task. The data collected in a Flash Hazard Analysis is used for the purpose of injury prevention and the determination of safe work practices and the appropriate levels of FR clothing and PPE.

Flash Protection Boundary: The distance from an exposed live part within which a person could receive a second-degree burn if an electrical arc were to occur.

FR (Flame Resistant): FR refers to the ability of a material to self-extinguish upon the removal of an ignition source.

HRC (Hazard/Risk Category): The five Hazard/Risk categories are specified by the chart listed in NFPA 70E. The chart, based on specific job tasks, ranges from HRC 1 (which is low risk and allows for 100% treated cotton), up to HRC 4 (which is high risk and required FR clothing with a minimum arc rating of 40). The HRC is used to determine the necessary arc rating of a garment worn during a given job task.

NFPA® 70E: A work standard published by the National Fire Protection Association (NFPA) that covers aspects of electrical safety in the workplace. It includes the recommendation that those who work with, on or around energized equipment use adequate protection, including FR clothing.

REGULAR, SHORT & TALL SIZES

If your body measurement is:	You should order this size:	
Height	Recommended Length of Garment	Length of Overall Inseam
5'3" to 5'7"	Short*	28
5'7" to 5'11"	Regular	30
5'11" to 6'3"	Tall	32

*Available in coveralls only.

Differences between Regular & Tall Sizing:

Outerwear, Long-Sleeve Shirts, and Sweats:
 - Tall sizes are 2" longer than Regular sizes.
 - Tall long-sleeve lengths are 2" longer than Regular sleeve lengths; short-sleeve lengths are ½" longer than Regular sleeve lengths. Also applies to Coverall Style XD6.

Coveralls:

- Tall sizes are 1" longer in the torso than Regular sizes.
 - Tall sleeve lengths are 1" longer than Regular sleeve lengths. Does not apply to Coverall Style XD6.
 - Short sleeve lengths are 1" shorter than Regular sleeve lengths.

INSEAM LENGTHS

If your normal inseam preference is:	You should order this size:
Inseam Measurement	Overall Inseam Measurement
27-28	28
29-30	30
31-32	32
33-34	34
35-36	36

NOTE: If your inseam length falls between sizes, buy the larger size.

HOW TO MEASURE

For best results, measure over your undergarments.

Chest:

Measure just under arms and across shoulder blades holding the tape firm and level. If your chest falls between sizes, order the next size up.

Waist:

Measure around your natural waistline, keeping the tape comfortably loose.

Inseam:

Measure pants that fit you well. Lay them flat, with the front and back creased smooth. Measure along the inseam from crotch to bottom of leg hem. Or, if you don't have pants that fit comfortably, measure from your crotch to your desired pant length.

Use this information as a guide. Specific styles may vary. Sizing samples are available. Please call Customer Service for more information.

Chest:

Measurement should be taken around the fullest part of the chest with arms down, just under the arms and across the shoulder blades.

Sleeve:

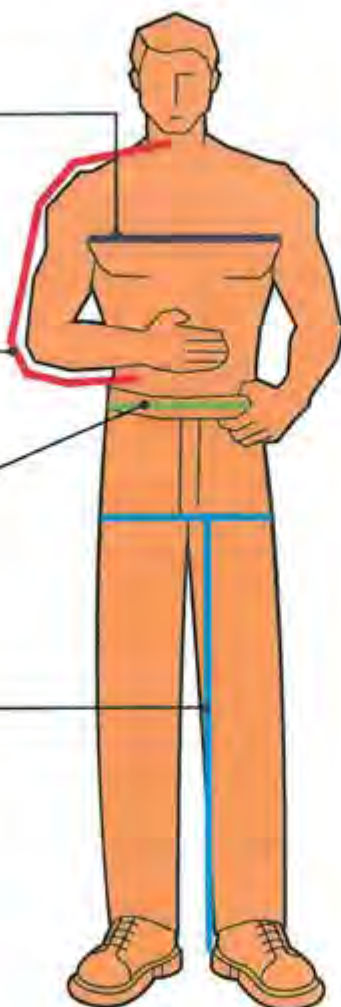

With elbow bent, measure from center of neck (backside) to elbow and over to wrist.

Waist:

Measure around waist (not pulling tightly) at the height you prefer to wear the waistband.

Inseam:

Take a pair of pants that fit you well and measure from the crotch to the bottom of the leg.

GUIDELINES TO SUBMITTING YOUR ARTWORK

Submitting Your Artwork

1. **Contact the person who created the logo at your customer's company.** Your customer can also contact a printer who has printed anything with the logo on it (letterhead, business cards, etc.) They will likely have camera-ready artwork and the Pantone® colors of the logo.
2. **Include Pantone® color numbers for the logo while configuring your hat.** Because color is highly subjective, and different computer monitors show colors differently, the Pantone® Matching System (PMS) is the universally accepted system used to identify colors. You or your customer should list known Pantone® colors under the colors field above.
3. **Submit your artwork and Pantone® color numbers to decospecialist@bullard.com.** Feel free to call Customer Service at (877) BULLARD if you have questions about logo requirements.

Acceptable & Preferred File Types: Camera-Ready Artwork

Deliver superior customized hard hats to your customers - with stunning logos advertising their companies! Bullard offers quick **three day turnaround times** for camera-ready artwork proofs. Please submit electronic vector files to [Bullard Art at decospecialist@bullard.com](mailto:decospecialist@bullard.com). Providing camera-ready artwork will give you the sharpest logos with the fastest lead times. Camera-ready files are high-resolution (300 dpi) Mac-based files with the following extensions:

- EPS, FH, AI, CDR
- PDF (Please Note: PDF files are considered camera-ready only when saved in readable text and graphics format.)

Tips for getting camera-ready artwork:

1. Ask your customer for **vector or line art**, as this original art used to print business cards, signs, letterhead, etc.
2. Ask for art that can be **converted to points and paths**, and includes any embedded files.
3. Remember, in most cases, neither you nor your customer may be able to open the file.
That's usually the file we need.

Non Camera-Ready Artwork

We want to reproduce your customer's logo in the highest quality possible. However, if you cannot obtain camera-ready artwork, we can re-create a logo for you from the following files. Please note: The file types listed below will require a **longer lead time of five to seven days** for proofs.

- .TIF, .JPEG, .PDF, .BMP, .PNG

You may still mail hard copy samples of this artwork, such as letterhead, business cards or camera-ready art on high quality paper (not raster or laser print outs). However, these samples should be clear, simple one-color designs or multi-color designs if the colors do not touch. A higher quality sample will produce the best reproduction.

The file types below are much lower-quality files, designed for viewing on-screen, not for high-quality printing. They will require a lead time longer than five days. This lead time will vary based on the complexity of the logo.

- Any file that has been copied or saved from a web site
- Word documents with inserted images

Selecting the Proper Grip

Three basic factors are needed in order to determine the proper grip for each specific application:

1. Type of wire or cable (ACSR, ACSS, AAC, Copper, Steel Strand).
2. AWG or MCM (Diameter) of wire or cable.
3. Maximum safe load required.

Authentic Klein Grips are organized according to these three factors to make it easy for you to choose the proper grip.

PRESENT INSTALLATION TOOL INDEX

This chart provides a cross-reference between die index numbers marked on BURNDY® COMPRESSION CONNECTORS and the CORRESPONDING DIE SETS used with the various BURNDY® INSTALLATION TOOLS. This is the only way to have a BURNDY® compression system.

A die index number has been assigned to each required groove configuration. A prefix letter is used to indicate the specific installation tool for which the die has been designed, as shown below.

① Cat. No. Y35P3 Adapter is required to accommodate "Y34PR" type indenter in Y35, Y39, Y750 HYDROOLS and with the PUADP-1 adapter in the Y45 and with the PT6515 adapter in the Y46.
 ② Cat. No. PT6515 Adapter is required to use "U" type dies in Y45 series tools.
 ③ Cat. No. PUADP-1 Adapter is required to use "U" type dies in Y46 series tools.

④ The MD6-6R2 ratchet tool is required on these sizes. The standard MD6 or MD6R ratchet tools will not work.
 ⑤ Also pneumatic version Y29HC.
 ⑥ Use U11T-1 for Y8C8C.
 ⑦ Hexagonal crimp.
 ⑧ Die 302 recommended for 1.84 O.D. barrel.
